

Tim Farrell

Senior Product Manager

[portfolio](#) | [linkedin](#) | [email](#)

Boston, MA

856-904-6017

SUMMARY

- Product builder/ leader specialized in data and AI/ML products for bio/ medicine.
- Strategic lead for several large-scale data and AI/ML platforms (eg billions of clinical records, 100s of models), driving product development from concept to commercial impact.

RELEVANT EXPERIENCE

OM1 / Boston, MA

Senior Product Manager / 2024–Present

- Lead O-to-1 development of [clinical AI product](#), taking a proprietary foundation model from internal capability to externally consumable product with multiple surfaces (e.g. [API](#)).
- Drive product strategy across payer, provider and life sciences markets, transitioning revenue streams from services to product based and enabling deals worth \$400k+ ACV.

Product Manager / 2022–2024

- Led [platform](#) that improved data product discoverability—driving 50% YoY revenue growth and enabling deals worth \$1.75M+ TCV—and streamlined delivery, reducing costs by 80%.
- Oversaw ML/AI enrichments (extraction + imputation), which increased observations by 4x. Built materials that drove significant commercial impact (e.g. deals worth \$500k+ ACV).

Day Zero Diagnostics (acquired by bioMérieux) / Boston, MA

Product Manager / 2021–2022

- Led product for company's first commercial offering ([outbreak detection for hospitals](#)).
- Drove CLIA certification process, to enable service to be sold as a clinical lab test.
- Scaled commercial traction from ~1 deal/quarter to 1–2 deals/month.

Manager, Bioinformatics Engineering / 2020–2021

Bioinformatics Engineer / 2019–2020

- Developed [data platform](#) to support ML model training and development. Grew data 35% YoY using partnerships and public data, building one of the largest datasets of its kind.

Broad Institute of Harvard and MIT / Cambridge, MA

Computational Biologist / 2017–2019

- Built [cloud-based genomics data system](#) supporting research and analytic workflows.
- Analyzed phase IV vaccine trial data and improved accuracy via error-correction research.

US Army Reserve

Operations Officer / 2012–2021

- Led operations for 100+ personnel; deployed overseas (2016) and for COVID-19 (2020).

EDUCATION

M.S., Bioinformatics – Boston University / 2014–2016

Activities: West End House Tutor (Chemistry and Math)

B.S., Biomedical Engineering – Rutgers University / 2008–2012

Activities: Army ROTC (Top 10%)

SKILLS

Product Management

O-to-1 development,
Product strategy, GTM &
commercialization,
Customer discovery,
Roadmapping

Data & AI

GenAI / LLM products, ML
lifecycle, Model evaluations,
Data platforms

Healthcare / Domain

Real world data (EMR/ EHR,
claims, etc), FHIR, SMART on
FHIR, Clinical trials,
Genomics

TOOLS

Work Management

Jira, Confluence, Google
Workspace

Prototyping/ Design

Figma, Cursor, Claude,
Python, Javascript/ React

Data/ Analytics

Snowflake, Databricks, Google
Analytics, BigQuery, Hex

PROFESSIONAL DEVELOPMENT

AI Product Management

[Duke University/ Coursera](#)
2026

Certified Product Owner
